

KEASSER DUNE GONZALES

Technical Virtual Assistant | Junior Full Stack Web Developer

Cotta, Lucena City, Philippines | +63 912 874 0782 | gonzaleskeasser@gmail.com | Available for Remote Work (Full-Time / Freelance)

PROFESSIONAL SUMMARY

Administrative and technical professional with 8+ years of experience in customer service, collections, account management, purchasing, reporting, and office operations, combined with hands-on experience in full stack web development. Proven track record of managing digital documentation, resolving client and account issues, coordinating cross-department workflows, and delivering accurate reports under deadline pressure. Currently building production-style web applications using React.js, TypeScript, JavaScript, Node.js, Express.js, and MySQL, with practical knowledge of REST API development, JWT authentication, Git/GitHub version control, Docker, and Postman. Brings a rare combination of strong administrative reliability, client-facing communication, and modern software development skills, well suited for Technical Virtual Assistant, IT Support, and Junior Full Stack Developer roles in remote and distributed teams.

Core Strengths: Full Stack Web Development • Administrative & Virtual Assistance • Client Communication & Account Management • Data Entry & Database Management • Report Preparation & Documentation • Technical Troubleshooting & Support • Process & Workflow Coordination

Administrative & Productivity Tools

Office & Collaboration: Microsoft Office Suite • Google Workspace • Email Management • Google Calendar Scheduling • Administrative Support • Customer Service

Creative & Media: Canva • Adobe Premiere Pro • Adobe Audition • Video Editing

PROJECT EXPERIENCE

Barangay e-Services Portal — Full Stack Web Developer (Personal Project)

Designed and developed a full-stack web-based barangay service management platform providing digital services for residents and administrative staff, replacing manual, paper-based processes.

- Built resident registration and secure login authentication using JWT-based session security
- Developed a resident user dashboard with profile management and online application submission
- Implemented an application tracking system allowing residents to monitor request status in real time
- Built admin-side management features for resident records, application approvals, and reporting
- Designed and integrated a MySQL database for structured storage of resident and application data
- Structured the project with a React.js + TypeScript frontend and a Node.js/Express.js REST API backend

Technology Stack: React.js, TypeScript, Node.js, Express.js, MySQL, REST API, Docker, Git, GitHub
